

THE ART OF

FEMININE PRESENCE™

Be a Light for the world

What is the 'feminine?'

The Feminine Essence lives inside every woman. It's an energetic, empowering, and magnetic quality that has nothing to do with the way you look on the outside. When a woman embodies her feminine essence she does not need to project a powerful persona to attract the respect and attention she wants. She becomes attractive, radiant, sensual, and grounded.

What is presence?

There are women who walk into a room and are noticed by many. They have an air of confidence about them that is attractive. There are others who frequently comment, "No one remembers I was even there." One has 'presence,' one does not. Presence makes people feel more attracted to you, and trusting of you.

POWERFUL and FEMININE

In the pursuit of a career, or having to take care of so many people around you, many women have disconnected from their feminine essence and their personal presence without realizing it. This affects everything. From being able to attract and keep a passionate lasting love, the state of our health, fulfillment in our work, and to the unfortunate situation of women competing against women everywhere.

During these weekly classes you will:

- Develop a physical and energetic presence that attracts the attention you want: personally and professionally.
- Feel more comfortable with your sensuality, and with receiving positive attention.
- Experience more passion in your life - particularly your love life.
- Be more at ease setting clear boundaries with others.
- Learn to follow your "higher guidance" rather than always pushing to make things happen.
- Look and feel more confident and radiant when you walk into a room.
